Tuning comments for this table:
 VE Rear Cyl Table

VE is used to correct for pumping losses in the engine. The lower the value, the less air is entering the cylinder; Conversely, the higher the value the greater the amount of air is entering the cylinder.

Comments included with this file:
 File Name: DAD009-01-A0.MT9

Application: 2010-2013 ETC Touring Bikes

Configuration: 1690 High Output

Components:

- A/C and Breather Kit
- 3 7/8" Big Bore Cylinders
- 3 7/8" High-Compression Forged Pistons
- Performance Cylinder Heads
- 0.569" Lift 252/260 Duration Camshaft
- Race Exhaust
